

## Sr. Web Developer

### COMPANY SUMMARY

Are you ready for an exciting career with a technology firm that is working on cutting-edge products that continually sets the bar for the competition to follow?

Then come join the geoAMPS team and be part of a software-product organization that has a cool work culture, great work atmosphere and amazing growth potential. We are currently hiring a **Sr. Web Developer** for our office in Powell, Ohio, and we would love to talk with you about your work experience and career objectives.

geoAMPS is the market leader in providing software solutions to manage land rights and infrastructure assets. geoAMPS was founded on a simple notion: offer the best technology solutions while forming lasting relationships with our clients. We are pushing the industry forward by bringing state-of-the-art technology, increased communication and quicker project completions for our customers.

### JOB SUMMARY

The Web Developer will collaborate with requirement analysts, system testers and other developers to design, develop, test and deliver project solutions. You will enhance or modify the geoAMPS product(s) framework to solve complex business problems to drive desired results.

### PRIMARY RESPONSIBILITIES

- Modify and enhance the geoAMPS framework to solve complex business problems and drive desired results
- Design, code, test, debug and document geoAMPS software solutions
- Create and review design documentation
- Participate in project-estimation discussions
- Review requirements and test cases for clarity and coverage
- Develop complex project deliverables
- Review and fix quality defects
- Support the implementation of developed software solutions
- Progressively take on leadership of other developers, specifically technical oversight and coordination of the distributed team.

### SKILLS/EXPERIENCE

- 5+ years of experience in the following programming languages: ASP .NET; SQL Server; Object Oriented Design; VB.Net; C#; Team Foundation Server
- 1-2 years of experience with agile practices and principles.

- 5+ years of experience working with an established Java Script library such as jQuery is desired as well as familiarity with common software-development patterns
- Ability to implement program changes from technical requirements
- Problem-solving skills to determine the programming effects on existing systems
- Strong written and verbal communication skills
- Thorough understanding of systems and system analysis, design techniques and developing business application
- Extensive knowledge of the systems development life cycle
- Good understanding of project-management concepts and techniques
- Ability to interact with all levels within the company

## **EDUCATION**

- Undergraduate studies in computer science, management-information systems, mathematics or related field, or equivalent professional experience
- In Person interview required

## **WHAT IS IN IT FOR YOU**

- Being an integral part of a dynamic, growing company that is well-respected in its industry
- Competitive pay based on experience
- Medical, dental and life-insurance benefits

**\*You must be legally entitled to work in the United States in order to apply for this position. geoAMPS is an equal opportunity employer.**
